Researches

Autosuggestion as a mediator in weight management in female college students. Master's Thesis. (M.Sc, 2014-15)

- Sample: 82 female college students, convenient sampling method. The selection of the 82 participants were based on the Inclusion and Exclusion Criteria.
- The participants selected were assessed for their anthropometric data and they also completed WHO (Five) Well- Being Index. Group A (Exercise Diet Autosuggestion) and Group B (Exercise Diet).
- Results: A marginal but not a statistically significant difference in the body weight of the participants in both Group A and Group B. There was a statistically significant difference in the well-being of the participants in both Group A and Group B.

Mindfulness and Burnout of Teachers in StateBoard and Matriculation schools (Demographic factors). Master's Project. (M.Sc, 2014)

- Sample: 150 (51 Female and 24 Male in State board)(58 Female and 17 Male in matriculation)
- Scales : *Mindfulness Attention Awareness scale* and *Burnout Inventory*.
- The data were analysed by standard statistical tools such as karl pearson co- efficient of correlation, analysis of variance and t-test.
- Result: There were no statistically significant relationship between Mindfulness and Burnout in both Matriculation and State board schools.

Relation between Indian Zodiac and Personality types(MBTI). Master's Project. (M.Sc, 2015)

- Sample: 100 samples (Female 52 & Male 48) , were randomly selected.
- *The Myers Briggs Type Indicator* (MBTI) was administered and scored.
- The results showed that there was no significant relation between the two variables.
- The sample size cannot determine the relationship, further studies can be done to conclude or disprove the findings of the current study.
