

NEW CONSTRUCTION / AFE MAINTENANCE MANAGER

Summary

23 years in the Industry, with 18 years of Management / Supervisory experience in Shutdowns, T/A's, and Project related work. Safety statistics for all projects are always at the highest level. A Proven track record as Manager / Supervisor managing a variety of construction teams and projects with a <0.5 trir. my experience is within all complexes of the benicia refinery. extensive background in many areas of construction have given me the knowledge and skill to effectively function as the safety manager for the plant. recognized strong team leadership skills and relationships with contract groups, both union/non-union trades. my integrity, reputation and credibility as a leader are what our plant needs to influence safety processes and programs for the betterment of our workforce. i am a proven liaison between plant work groups. results-oriented manager that works efficiently and effectively to complete projects safely, on time and within budget. analytical nature and skills of predicting and vetting construction projects benefits the safety manager position. i am applying for self-starter with a positive, can-do attitude who is driven to learn, improve and succeed and move the >

Highlights

- Safety Plans / Programs
- Strong Interpersonal skills
- Safety Standards / Procedures
- Good Communication skills
- Excellent written/verbal skills
- Credible Leader, with the highest level of Integrity
- Strong Team work, discipline, accountability, competitiveness, and pride
- MS Proficient
- Strong Leadership abilities
- Excellent Execution abilities
- Resource allocation
- Budget / Cost control
- Volunteerism/ Executing Crew Projects: Our crew was big on Adopt-A-Family, Giving tree and community involvement projects. Some of the community projects were Fisher House, Omega Boys and Girls Club, Loma Vista Farms, Cruise for a Cause as well as Hooked on A Cause to name a few. New Projects this year are working with the Solano County Food Bank.

Accomplishments

- Building an Organization to handle 5 year tank plans
- Leveled out our current 5 year Tank plan
- Building a 10 year strategic plan to standardize reporting
- Instituted 3 week look aheads for leveling out manpower and head count control, which resulted in significant cost control measures.
- 2008-2010: Managed Off-Site Battery Limits Projects, which included site clearing for the construction of four new units within the Valero Benicia Refinery. I was an Operations Supervisor with a vast track record of running safe and successful T/A's for the previous 10 years. Volunteered to take on a lead role as a team player, to improve my knowledge and experience, and trained for this position, having managed so may T/A's, squats and previous unit emergencies. Handled very large workloads with success. Previous T/A management with head counts (200 employees). Effectively managed construction crews of various trades during our VIP Project with head counts of 500 construction employees, supervisors and managers in parallel. Executed work managing supervisors from VLO/Eichleay/Harvest Eng. To successfully complete the project. Systematically closed out all projects per refinery standard procedures/ turnover packages. The project began with and included the following
- Safety: Standardized our Site Safety Plan. The Safe Plan template was designed to ramp up and down to follow the VIP Project schedule/headcount. Safety Plan encompassed the VIP OSBL Project, Butamer ISBL Project, FBS OSBL/ISBL Project, and provisions for the new H2 plant. Safety Teams for each of these project utilized my plan to help ensure the Safety of all construction crews
- Construction: Successfully managed all Outside Battery Limits (OSBL)/ Inside Battery Limits (ISBL) projects, FGS OSBL, Utilities Upgrades, and the H2 unit prep. Volunteered to assume the role of Butamer Mechanical Coordinator (ISBL), as my workload lightened up. Already heavily involved in the construction phases of all projects, and familiar with the crews coming on board, so it made sense
- Successfully managed Union and Non-Union crews on the same jobsite without any mentions of strikes

Experience

Company Name City , State New Construction / AFE Maintenance Manager 02/2015 to Current

- Effectively directs the Safety and Health program / processes in our work group.
- Leads weekly relevant Safety Meetings with Contractors / Employees to ensure a top down approach.
