

Prefix Strings

Given vector of strings and a small string. You need to find all the strings in the vector which has small string as a prefix. Return the vector of required strings in a sorted manner.

Example:

```
vector<string> words={"abc","abd","acde","abe","aeb","abba"};
```

```
string small="ab"
```

```
vector<string> output={"abba","abc","abd","abe"};
```

Solution: prefixStrings.cpp
