

Python: Division

Check [Tutorial](#) tab to know how to solve.

Task

Read two integers and print two lines. The first line should contain integer division, $a // b$. The second line should contain float division, a / b .

You don't need to perform any rounding or formatting operations.

Input Format

The first line contains the first integer, a . The second line contains the second integer, b .

Output Format

Print the two lines as described above.

Sample Input

```
4
3
```

sample Output

```
1
1.3333333333333333
```
