

# What's Your Name?

You are given the firstname and lastname of a person on two different lines. Your task is to read them and print the following:

Hello `firstname` `lastname`! You just delved into python.

## Input Format

The first line contains the first name, and the second line contains the last name.

## Constraints

The length of the first and last name  $\leq 10$ .

## Output Format

Print the output as mentioned above.

## Sample Input

```
Guido
Rossum
```

## Sample Output

```
Hello Guido Rossum! You just delved into python.
```

## Explanation

The input read by the program is stored as a string data type. A string is a collection of characters.
