

pranaOS Project Structure

Krisna Pranav

About:

what is pranaOS:

pranaOS is an unix based operating system built using c++ and clang. I created this project on 27 March 2021 and now it is well going.

Features of pranaOS:

- **pranaOS supports for x86 arch and having ideas to give support for arm based devices.**

Libraries:

- **libc(basic clang library)**
- **libcpp(cpp runtime support)**
- **libobjc(objective-c runtime support)**
- **libui(ui functionality)**

Kernel:

- **Basic x86 Kernel**
- **FileSystem**
- **PS2 / USB Keyboard**
