## Info:

This crackme is made with “La Fabbrica dei Giochi”. The Italian version of “The Games Factory”. The crackme is a nice videogame you have to hack.

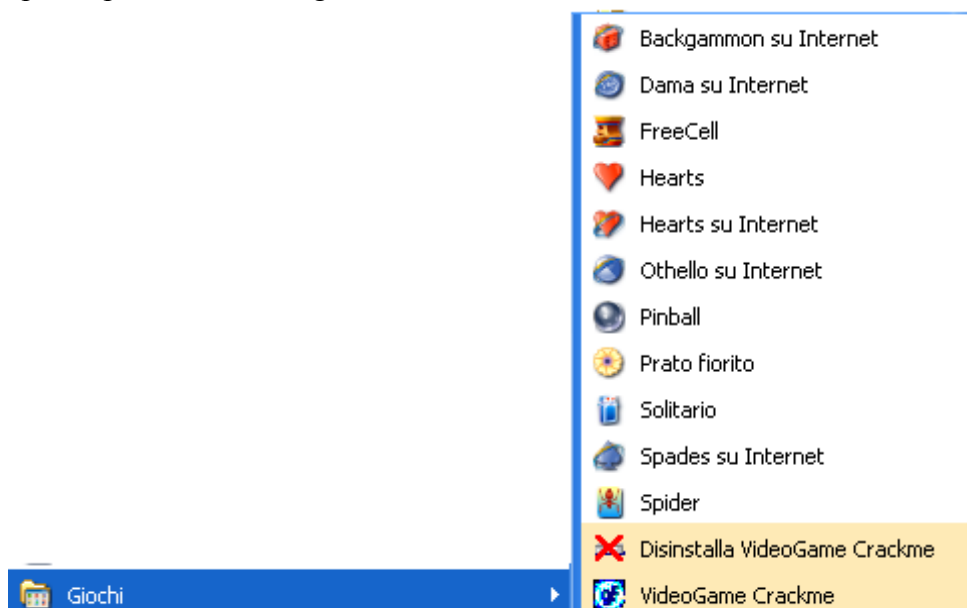

Unzip the files in a directory.

Run the setup.

Some word in the setup are in Italian but you only need to click “Setup VideoGame”.

Ok. The setup will put a link to the game in the windows menu with the other windows game.

## Rules:

- 1) Make the number of lives unlimited.
- 2) Hack the game to make 1,000,000 of points (or more)
- 3) Don't remove the last window. Look down.

It is not a nag. It just says that this version of the crackme is free. I can't sell it because I made it with an unregistered version of "the games factory".

- 4) If you want you can't uninstall it with "Disinstalla VideoGame crackme"
