Work Experience

Amazon

SOFTWARE DEV ENGINEER - INTERN

- Team: IN Payments Use Cases - Tech
- Working with P2P payments team.

Hyderabad, India

Jan 2021 - Present

SendX

MANAGEMENT TRAINEE (HACKERBOY)

- Team: Technology
- Implemented the Integration layer, starting with Glockapps in order to enhance the data already present on the platform.
- Added a feature to allow users to send mock emails and test out the platform. Added infra for domain and member email verification using JWT.
- Implemented the Incident Management CRM, which allows users to resolve and discuss Incidents relating to IPs, and SubAccounts.
- Implemented the onboarding checklist, the front and the APIs.
- Designed SendPost Goodies like Hoodie/T Shirts and Masks.
- Once the product was built, worked on frameworks like BullsEye, and AARRR to understand the funnel of customer impact and figure out items to work on in the next product cycle.
- Wrote a bunch of Python/Go Auth Frameworks/Tools: Beego, NSQ
