Meet **Fraunces**, a new “Old Style” family by Undercase Type.

In the summer of 2018, Google Fonts approached us with the challenge of designing a display typeface. We spent some time perusing the catalog, and were struck by a pretty big gap in the typographic voices available. There isn’t a specific name for this genre, but typefaces such as Cooper Black, Windsor, and Souvenir personify it. We call them “wonky” fonts in-house, and that seems as good a name as any. We’ve played a lot with this style in our lettering work (Fig. 1), and felt this was a great opportunity to create a typeface family that celebrates the genre.

The origin of “wonky” fonts traces its roots back to the Arts and Crafts experimentations of the late nineteenth and early twentieth centuries. Golden Type by William Morris, and the extensive lettering of the Roycroft Guild drew upon a heavily romanticized ideal of an “Old Style” that their progress-besotted contemporaries had lost touch with. Morris’ Golden Type was an extremely crude interpretation of the types of fifteenth-century printer Nicolas Jenson, opting instead to emphasize the perceived effects of the printing process, rather than the calligraphic origins of the form.

Ironically, the letters these artists created, and the interest in wonky Old Style typefaces that followed it in subsequent decades—heavy-hitting display typeface favorites like Cooper Black by Oswald Cooper, Windsor by Eleisha Pechey, or Clearface by Morris Fuller Benton/Linn Boyd Benton—had little or nothing to do with typefaces of antiquity. No one was really trying to score points for rigorous historical authenticity. Instead, these typefaces were playful, even outright goofy, a way to inject some personality into modernity. Even during this era, types like Richardson Old Style by Robert DeLittle (Fig. 2) showcased some of the more elegant possibilities of this expressive approach.

During the 1970s, graphic designers were raiding style books and publications of earlier generations for looking for more funky stylings, and found a treasure trove in the “Old Style” types of the era. The irreverence and friendliness of these typefaces were the perfect

countercultural antidote to the perceived stuffiness and chilly efficiency of traditional text faces. A prime example of this style coming out of the ’70s was Ed Benguiat’s swashy version of Bookman for ITC. Benguiat’s type was an ode to Oswald Cooper’s Cooper Black Italic. It’s known to most people today as the friendly typographical wave of the small businessperson to their regular customers: the ubiquitous “Thank You For Shopping With Us” (Fig. 3) that graces the sides of grocery bags all over North America.

Mostly shunned since the 1990s as being vaguely tasteless and disreputable, there’s been a twenty-first century revival of interest and use of these typefaces. With the advent of new type technology such as variable fonts, it’s a great opportunity to update this genre with a typeface family that is made uniquely for our time. Please enjoy, and as ever, thank you for shopping with us.

Fraunces 144 G100 Regular

Ask me about my Optical Size Axis

The Optical Size axis is similar to the Goofy, in that it controls the overall contrast between thicks and thins. The Optical Size axis goes a step further, however, and factors in additional changes depending on the size of the font. At smaller sizes, the letterspacing opens up, x-height increases, and contrast decreases to allow for easier reading. Additionally, at 18 pt/px and below, substitutions for the “wonky” characters are made automatically.

With 2 Styles (Roman, Italic), 3 Optical Sizes (144, 72, 9), 3 Goofy Styles (G0, G50, G100), and 5 Weights (Thin, Light, Regular, Semibold, Bold, Black), Fraunces comes with 108 predefined instances for easy navigation of the design space.

STYLE	OPTICAL SIZE	GOOFY	WEIGHT
Fraunces	9	G0	Thin
<i>Fraunces Italic</i>	72	G50	Light
	144	G100	Regular
			Semibold
			Bold
			Black

LANGUAGE SUPPORT

Fraunces supports a wide range of languages for global and local audiences, including: *Afrikaans, Albanian, Azerbaijani, Basque, Bosnian, Catalan, Croatian, Czech, Danish, Dutch, English, Estonian, Filipino, Finnish, French, Galician, German, Hungarian, Indonesian, Irish, Italian, Latvian, Lithuanian, Malay, Norwegian Bokmål, Polish, Portuguese, Romanian, Slovak, Slovenian, Spanish, Swahili, Swedish, Turkish, Vietnamese, Welsh, Zulu*

When the going gets wonky, the wonky turn pro.

The Wonk axis controls the substitution of “wonky” characters. These substitutions automatically switch at smaller sizes (18 pt and below), but can be toggled manually at larger optical sizes. The leaning h, n, and m is a characteristic borrowed from Windsor. In addition to the leaning characters, the Italic contains flagged characters with ball terminals.

The Big Three by Andy Sturdevant

This article was originally published in The Smudge, Issue No. 17,

It's the waning years of the twentieth century, sometime between 1970 and 1985. You find yourself in a position where the responsibility of managing the graphic design identity of a small business has fallen to you, though no one's calling it "managing the graphic design identity." Your job, basically, is to pick the Letraset sheets out of a catalog that will be used to create a logotype that will then be used on some external signage and business cards. This logotype will also go on the side of the one truck the business owns.

Your boss, who is also your uncle, has instructed you to find typefaces that are "approachable and unique, with a touch of the eccentric" (his words, not mine). You can tell by the way he says it, though, that he doesn't want you to get too experimental with it. His idea of "eccentric" does not extend to crazy, fat-bottomed letters dripping psychedelic ooze. Fine, whatever, it's just a summer job.

You spend some time with the Letraset catalog, and conclude that you really only have three choices for a type that is equal parts approachable and eccentric in the specific way your employer has mandated: Windsor, Souvenir and Cooper Black.

ABCabc123 *Cooper Black*

ABCabc123 *ITC Souvenir*

ABCabc123 *Windsor URW*

Today, these three typefaces are typically associated with the 1970s. I think of them as the big three of that era, graphic signifiers of the Watergate years that, even if you don't know them by name, you recognize the vibe.

They're much older than the seventies. Each of them dates from the early twentieth century, designed by lone individuals working

for major foundries in industrial centers. Windsor was designed in Sheffield in the United Kingdom in 1905, then a hotbed of steel production and labor militancy. Souvenir came from the industrial hinterlands of central New Jersey in 1914, from the drafting table of the head of the design department for America's largest type foundry. Cooper Black, the bubbly iron-on alphabet immortalized on ten million customized T-shirts, was created in Chicago in 1922.

They were created at a time when, in those industrial settings, there were individuals referencing a hand-made, more artistic sensibility in a time of rapid mechanization for the printing industry, and for the world generally. Souvenir was influenced by Middle European Art Nouveau, a movement that emphasized careful craftsmanship and organic forms as a means of humanizing industrial production. Windsor and Cooper Black were designed expressly as display fonts, for short, declarative lines of text, meant to draw attention in forms of print media dominated by grim, heavy serif typefaces. All three are bold statements, but none of them bang you over the head.

It's this humanizing quality that is most likely why designers in the early 1970s resurrected these three typefaces, when the techno-utopia of *Star Trek* was beginning to curdle into the techno-dystopia of *THX 1138*. If all of the room-sized IBM and Rand Corporation computers coordinating various mechanized atrocities across the globe had a chilly, efficient Swiss typeface like Helvetica slapped on the side of them, those warmer, more handmade typefaces seem like both a respite and a quiet protest. In any era marked by political and social turmoil, there's often an effort to call back to the more humane (and certainly, the idealized) aspects of an earlier era. Each of them, in an oblique way, called to mind the fantastical egalitarianism of the Belle Époque, when strains of mysticism, industrialism and socialism intermingled in the public imagination. Designing an underground publication or radical flyer in 1970,

A very typical use of Windsor

alluding to that era was a type of resistance against the modernity as it had been practiced: faceless, efficient and brutal. Windsor, Souvenir and Cooper Black, goopy as they may be, are none of those things.

To some extent, all of these typefaces all fell out of favor in the intervening forty years, as far as everyday use was concerned. When these things vanish from the world of high design, they migrate into marginal pockets of the commercial world. Most often when you see Windsor or Souvenir or Cooper Black in the world today, they tend not to be used in a self-consciously tasteful way. They always look a little assertive and individualistic and a little out of place. They tend to be used by independent liquor stores, health food emporiums, formerly fashionable nightclubs and ancient auto body shops, or maybe barbeque restaurants in dying strip malls and house remodelers with a lone Chevy Silverado. Whatever those typefaces may say, they don't suggest corporate efficiency and facelessness. They always look a little assertive and individualistic and a little out of place, a warm smile and a hand wave across a cluttered urban environment.

So you've finally decided to get that hot greenhouse you've always wanted. The thing you have to do is make a couple of decisions. How much money do you want to spend? How much work do you want to do? A hot greenhouse can range from a simple polyethylene covered 2x4 framework that you can put together in an afternoon for less than fifty dollars to a seventy thousand dollar fully automated conservatory with automated sprinklers and a hi-fi system for playing electronic music compositions to stimulate plant growth.

Congratulations on your decision to pursue CB radio. Before you purchase the equipment, ask yourself these questions about the radio and the accessories you plan to use. How will I use my CB? What handle will I use? Will I want to use it for my eighteen-wheeler or my houseboat? Do I have a reputable source for printing
