

Hello my dear customer!

Thank you for downloading that model, I hope you will like it!

It's a Free Preview model of the full series, called "**Moon Photorealistic**":

<https://www.turbosquid.com/Search/Index.cfm?keyword=gerhald3d+moon>

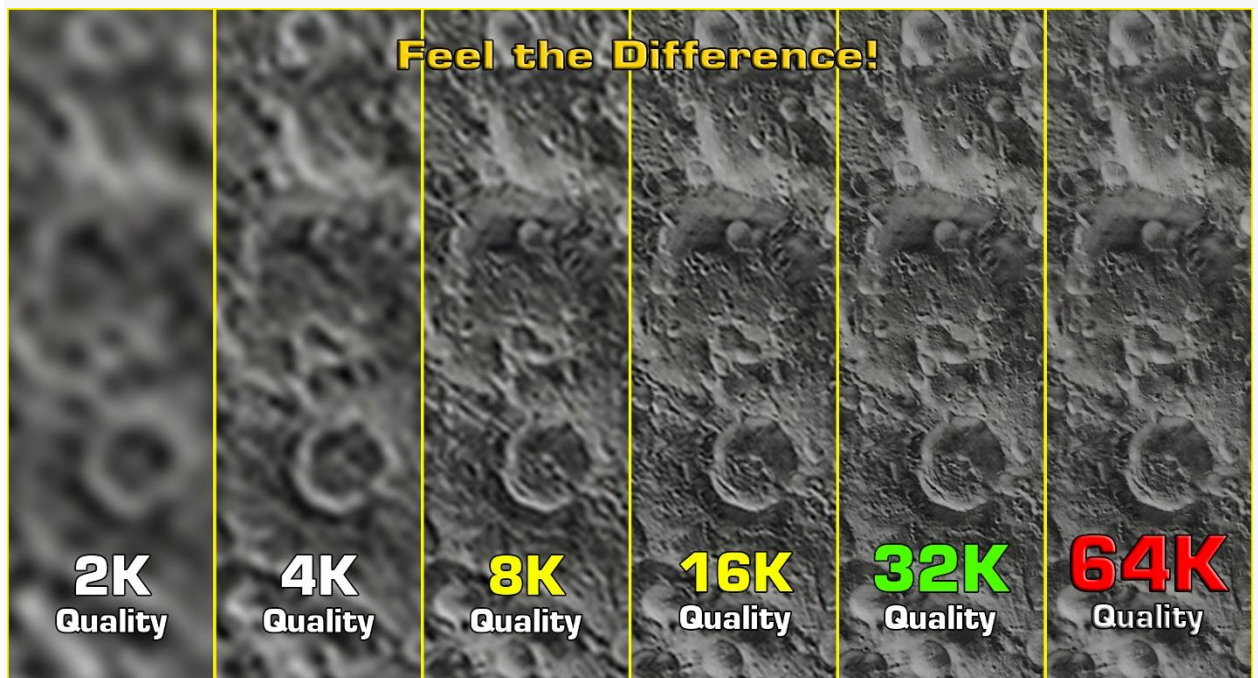

So, that model is the same and the ONLY difference is **TEXTURES QUALITY**.

Also, I added one of the models (Mars 8K) on Sketchfab, so you can take a look right now and **INSPECT** it **even more**:

<https://sketchfab.com/models/9465699f9f114b75a385fd78080c51c4>

THAT SERIES INCLUDES:

- Moon Photorealistic 4K - 39\$
- Moon Photorealistic 8K - 89\$
- Moon Photorealistic 16K - 129\$
- Moon Photorealistic 32K - 179\$
- Moon Photorealistic 64K - 399\$

ADVANTAGES of my models:

- **NO ANY ARTIFACTS, NO POLES**
- **NO VISIBLE SEAMS**
- **ABSOLUTELY CLEAR**
- UV map made in cubic projection as you can see on the preview photo, which:
 - 1) Saves 85% polygons in comparison with UV-sphere.
 - 2) Super simple cubic UV-map with no any stretching.
 - 3) I repeat that one more time: **NO ARTIFACTS ON POLES AND NO VISIBLE SEAMS** (because of edge padding made and cubic projection)
- Smoothable.
- All materials and textures are intelligently named.
- Formats .max, .obj, .fbx are included.

You will definitely not find such textures for free in internet, i already tried)

You can find my other models by that link:

<https://www.turbosquid.com/Search/Index.cfm?keyword=gerhald3d>

You can easily contact me, and I will consult you for any question. You are **welcome!**
