## EXPERIENCE

---

### Statistics specialist

01/2008 - 12/2015

- At the helm of a robust data science division, I orchestrated the migration from on-premises data solutions to AWS. Deployed large-scale machine learning models using AWS Sagemaker, revolutionizing the company's data-driven decision-making process. Fostered relationships with business stakeholders, ensuring that technical deliverables always aligned with business goals.
- Hard skills: AWS Sagemaker, Machine Learning Deployment, Data Strategy, Stakeholder Engagement.

### Data Solutions Architect

01/2016 - 06/2020

- Identified a critical need to optimize and scale data infrastructure amidst growing data volume and complexity. I was tasked with architecting, designing, and implementing data solutions. Spearheaded a team to implement cloud-based solutions using AWS, redesigning ETL processes, integrating data warehousing solutions, and enhancing data security protocols. Adopted microservices architecture and employed AWS Lambda and Glue for serverless compute and scalable ETL operations respectively. Successfully mitigated data bottlenecks, enabling a 60% improvement in data processing times.
- Hard skills: Microservices Architecture, AWS Lambda, Schema Design, Data Warehousing.

### Data Consultant and Strategist

07/2020 - Present

- Currently advising a portfolio of top-tier clients on shaping and refining their data strategies. Offering expertise in AWS tools and technologies, helping clients architect scalable and robust data solutions. Championing data-driven transformation projects, leading to measurable business outcomes.
- Hard skills: Data Consulting, AWS Expertise.
