

Position: Tech Lead - Data Scientist (AWS Specialist)

Duration: Permanent Position

Key Responsibilities:

- Drive the design and development of innovative data science solutions for our users, ensuring alignment with business goals.
- Lead a team of data scientists and engineers, fostering a culture of collaboration, continuous learning, and excellence.
- Collaborate closely with stakeholders, translating complex technical details into actionable business insights.
- Design, develop, and deploy data science solutions using AWS services and tools.
- Provide mentoring and guidance to junior team members, and drive best practices in data science within the team.
- Keep updated with the latest trends and technologies in data science, ensuring our solutions remain cutting-edge.

Required Hard Skills:

- Minimum 6 years of experience in Data Scientist positions.
- AWS Expertise: Proficiency in AWS services such as Sagemaker, Redshift, EMR, Glue, Lambda, and Kinesis.
- Data Modeling and Mining: Ability to design and implement efficient data models and mine valuable insights from complex datasets.
- Programming: Solid experience with languages and tools like Python, R, SQL, and Spark.
- Machine Learning: Expertise in building, validating, and deploying machine learning models at scale.
- Big Data Technologies: Experience with technologies such as Hadoop, Spark, and Hive.
- APIs: Experience in developing and deploying ML models as APIs using tools like Flask, Django, or FastAPI.
- Version Control: Proficiency with tools like Git and CI/CD practices.

Required Soft Skills:

- Strong Communication: Ability to articulate complex technical concepts to non-technical stakeholders.
- Team Leadership: Demonstrated experience leading teams, driving collaboration, and fostering a positive working environment.
- Analytical Thinking: Ability to dissect complex problems and provide innovative solutions.
- Client Orientation: A track record of maintaining strong client relationships, understanding their needs, and ensuring their satisfaction.
- Adaptability: Thrive in a fast-paced environment, adapting to rapidly changing requirements.
- Problem-solving: Strong troubleshooting skills, with a focus on pragmatic and efficient solutions.
- Continuous Improvement: Passion for enhancing processes and driving continuous learning within the team.

Preferred Qualifications:

- Bachelor's or Master's degree in Data Science, Computer Science, Statistics, or a related field. AWS Certified Machine Learning - Specialty or similar AWS certifications are highly advantageous.
