

Position: Junior Data Analyst (Power BI Specialist)

Duration: Permanent Position

Key Responsibilities:

- Develop, maintain, and optimize Power BI dashboards to represent complex data in a comprehensible format.
- Collaborate with data science and consulting teams to understand client needs and deliver timely and relevant data visualizations.
- Interpret and analyze data patterns to provide actionable insights.
- Participate in data cleansing and preprocessing to ensure data integrity.
- Regularly communicate findings and insights to both technical and non-technical team members.
- Stay updated with the latest trends and updates in data visualization and Power BI functionalities.

Required Hard Skills:

- Power BI: Proficiency in creating and maintaining dashboards, reports, and visualizations.
- SQL: Basic understanding of SQL for data querying.
- Data Modeling: Ability to design and understand data models and relationships.
- Data Cleansing: Experience with tools or scripting languages such as Python or R for preprocessing and cleaning data.
- Excel: Strong skills in Excel for data manipulation and analysis.

Required Soft Skills:

- Analytical Thinking: Ability to dissect complex data and derive meaningful insights.
- Effective Communication: Capacity to explain findings and insights in an easy-to-understand manner.
- Collaboration: Willingness to work with diverse teams and incorporate feedback.
- Continuous Learning: Eager to learn and adapt to new tools, technologies, or methodologies.
- Attention to Detail: Ensure data accuracy and integrity in all tasks.

Preferred Qualifications:

- Bachelor's degree in a relevant field such as Data Science, Statistics, Computer Science, or related.
- Previous experience or projects involving Power BI or other data visualization tools would be a bonus but is not mandatory.
- Familiarity with cloud platforms or data warehouses would be a plus.
