

Lemon

EXPERIENCE

Database administrator

01/2013 - 05/2016

- Recognizing the underutilized capabilities of AWS, I drove initiatives to optimize cloud resources. By implementing services like Redshift and Lambda, data storage and processing costs reduced by 20%, while boosting efficiency.
- Hard skills: AWS Redshift, AWS Lambda, Cloud Optimization.

Spark Developer

06/2016 - 09/2019

- I implemented a scalable data processing pipeline using Apache Spark, significantly enhancing big data processing capabilities. My solutions improved the speed of analytical tasks by 50%. Moreover, I identified and troubleshooted data-related issues, ensuring data integrity throughout processing pipelines. I actively collaborated with cross-functional teams, including data scientists and analysts, ensuring data availability and reliability.
- Hard skills: Apache Spark, Big Data Pipelines, ETL.

Cloud and Data Consultant

10/2019 - 12/2021

- I identified areas of improvement in data strategies. I introduced Databricks as a solution for several clients, integrating it with AWS, which led to a unified and more efficient data processing approach, bringing in an average 40% improvement in data workflow for those projects.
- Hard skills: Databricks, AWS Integration, Data Strategy.

ETL Specialist

01/2022 - Present

- Identifying the need for better ETL processes, I initiated the integration of AWS Glue into our existing workflows. This resulted in cleaner and more consistent data outputs, improving subsequent analytics tasks' accuracy.
- Hard skills: AWS Glue, ETL Optimization, Data Cleaning.

SOFT SKILLS

Effective Communication, Project Management, Cross-Functional Collaboration, Continuous Learning, Client-Centric Approach.

LANGUAGES

English, Spanish.
