## EXPERIENCE

---

### Junior Data Engineer (XYZ Solutions)

06/2010 - 12/2013

- Starting at XYZ Solutions, I was responsible for maintaining and improving existing ETL pipelines. During this period, I identified inefficiencies and introduced automated data validation processes, resulting in a 15% reduction in data inconsistencies.
- Hard skills: ETL Processes, Data Validation, SQL.

### Data Engineer (XYZ Solutions)

01/2014 - 06/2017

- As I took on more responsibilities, I spearheaded the migration of our legacy systems to AWS. Leveraging services like Redshift and S3, I played a key role in streamlining our data storage and processing capabilities, leading to a 30% improvement in processing speeds.
- Hard skills: AWS Redshift, AWS S3, Data Migration.

### Senior Data Engineer (XYZ Solutions)

07/2017 - 11/2020

- At this stage, I took the lead in adopting Databricks for more efficient big data processing. Collaborating with cross-functional teams, I ensured a seamless integration with our AWS infrastructure, enabling the company to handle 3x the data volume without compromising performance.
- Hard skills: Databricks, Big Data Processing, Cross-Functional Collaboration, PySpark.

### Tech Lead Data Engineer (XYZ Solutions)

12/2020 - Present

- In my current role, I oversee the entire data engineering team, strategizing and implementing best practices. My focus on continuous optimization and adoption of tools like AWS Glue has further enhanced our ETL workflows, achieving a 40% increase in team productivity and data accuracy.
- Hard skills: AWS Glue, Optimization.

## SOFT SKILLS

---

Strategic Vision, Effective Communication, Problem Solving, Mentorship, Continuous Improvement, Adaptability.
