

Apple

EDUCATION

Bachelor's in Psychology

Master's in Data Science

EXPERIENCE

Data Associate

02/2019 - 06/2021

- I was involved in maintaining the initial ETL pipelines and collaborated with senior engineers in the migration of a fraction of our data systems to AWS. This role allowed me to gain foundational skills in data engineering and cloud systems.
- Hard skills: Basic ETL Processes, AWS Fundamentals, Data Maintenance.

Data Engineer

07/2021 - Present

- In my current role, I specialize in creating and optimizing Apache Spark-based workflows in Databricks, ensuring seamless data flow and processing across the pipeline. Using AWS services, I've implemented cloud-native solutions and ensured optimal data storage, retrieval, and processing capabilities. I work with data scientists and analysts to guarantee data availability and reliability, tailoring solutions to meet analytical requirements and ensuring scalability to accommodate evolving data needs. A part of my role involves troubleshooting and resolving data-related issues, thereby ensuring the utmost data accuracy and integrity.
- Hard skills: Databricks, Data Processing, Redshift, S3, Lambda.

SOFT SKILLS

Team Collaboration, Quick Learner, Analytical Thinking, Effective Communication, Adaptability, Attention to Detail.

LANGUAGES

English, Spanish, French (Intermediate).
