BA in Computer Science

Master's in Computer Science

EXPERIENCE

Front End Developer

06/2015 - 08/2018

- Part of a team responsible for creating web platforms for local businesses. Encountered a recurring issue where client websites were not optimized for mobile devices. Took the initiative to adapt responsive designs using Angular, leading to a consistent 30% increase in mobile user traffic across all implemented sites.
- Hard skills: Angular, Responsive Design, UX, Cross-Browser Compatibility.

Senior Front End Developer

09/2018 - 03/2021

- Engaged in a local tech consortium that provided web solutions for diverse businesses. The need to introduce more modern and efficient technologies was evident, so I steered the transition to Angular. This move, combined with constant interfacing with backend teams, resulted in integrated, peak-performing web apps. By implementing tools like Webpack for efficient bundling and ESLint for ensuring code quality, we crafted integrated, peak-performing web apps. Consequently, project delivery timelines improved by 25%, and client feedback was overwhelmingly positive, leading to a 20% growth in client referrals.
- Hard skills: Angular, RESTful API Integration, Webpack & ESLint.

Lead Front End Developer

04/2021 - Present

- Leading a diverse team of developers to enhance and maintain an e-commerce platform, actively tackling technological challenges and consistently optimizing the user experience. Currently collaborating with UI/UX experts to implement innovative and seamless designs, while simultaneously focusing on strategies to further boost user engagement and drive sales growth by leveraging advanced technologies and agile methodologies.
- Hard skills: Angular, TypeScript, Responsive Design, UI/UX, RESTful services Integration.

SOFT SKILLS

Effective Communication, Team Leadership, Analytical Thinking, Client-Centric Approach, Problem-Solving, Adaptability.
