

Position: Lead Front End Developer

Duration: Permanent Position

Key Responsibilities:

- Lead and mentor a team of front-end developers to ensure best practices and cohesive code.
- Collaborate closely with UI/UX designers to transform designs into high-quality, responsive web applications.
- Engage with backend developers to ensure seamless integration with APIs and other backend services.
- Participate in code reviews, ensuring maintainability, scalability, and performance.
- Develop and enforce front-end coding standards and introduce innovative tools and frameworks.
- Act as the primary interface with clients and stakeholders for all front-end related discussions and decisions.

Required Hard Skills:

- Minimum of 6 years of experience in front-end development
- Expertise in Angular: Must have deep knowledge of Angular components, services, and best practices.
- TypeScript Proficiency: Strong understanding of TypeScript and its nuances.
- Responsive Design: Experience with frameworks like Bootstrap or Materialize, and the ability to create custom designs.
- Version Control: Proficiency in Git and GitHub/GitLab workflows.
- Performance Optimization: Knowledge of techniques to ensure fast web page loading times and optimize the user experience.
- Unit Testing: Familiarity with testing frameworks like Jasmine or Karma.
- Integration with APIs: Ability to integrate RESTful services and understand backend workflows.
- Continuous Integration/Continuous Deployment (CI/CD): Experience setting up and using tools like Jenkins or CircleCI.
- Web Security: Understanding of common security risks and mitigation techniques.

Required Soft Skills:

- Strong Communication: Ability to articulate technical concepts to non-technical stakeholders and maintain clear communication with team members.
- Teamwork: Works effectively in a team setting, valuing collaboration and diverse perspectives.
- Leadership: Proven track record in leading and mentoring junior developers, fostering a positive and innovative work environment.
- Problem-solving: Analytical mindset, capable of breaking down challenges and creating actionable solutions.
- Adaptability: Comfortable with rapidly changing requirements and environments.
- Continuous Learning: Dedication to staying updated with the latest technological advancements and industry trends.
- Client-focused: Ensuring client needs are met with high-quality results.

Preferred Qualifications:

- Bachelor's or Master's degree in Computer Science, or a related field. Angular certifications are highly advantageous.
