

# Mango

## EXPERIENCE

---

### Full Stack Developer

04/2013 - 12/2018

- Led a team facing challenges in developing a responsive web application for a growing mobile user base. Co-ordinated with both frontend and backend teams, applying expertise in End-to-End System Architecture and Microservices Deployment, using tools like React and Node.js. This structured approach ensured seamless integration and resulted in a 35% increase in mobile user engagement over a year.
- Hard skills: React, Node.js, Responsive Design, End-to-End System Architecture, Microservices Deployment.

### Senior Full Stack Developer and Project Manager

01/2019 - 06/2021

- Identified inconsistencies in a major client's e-commerce platform causing user drop-offs. Orchestrated a revamp, focusing on Angular for frontend and Django for backend, and streamlined user checkout processes. The project successfully decreased cart abandonment by 25%.
- Hard skills: Angular, Django, E-commerce Optimization, Scrum.

### Lead Developer & Project Coordinator

07/2021 - Present

- Joined a startup aiming to launch a pioneering fintech platform. Drove the development process, incorporating Vue.js for frontend and Ruby on Rails for backend solutions. Within eight months, the platform attracted 10,000 active users, marking a promising start for the business.
- Hard skills: Vue.js, Ruby on Rails, User Acquisition.
