Bachelor of Science in Computer Science

Master of Science in Software Engineering

EXPERIENCE

Senior Full Stack Developer

11/2011 - 12/2017

- Managed a pivotal project, launching a financial tracking platform designed for real-time analytics on AWS. My role involved coordinating with the UI/UX team, developing the frontend using React, and establishing a Node.js backend hosted on AWS Lambda and RDS. This not only ensured stability and data integrity but also leveraged AWS's scalability and reliability. As a result, our internal teams gained immediate insights into financial data through the AWS-powered platform, enhancing decision-making and reducing report generation time by 35%.
- Hard skills: React, Node.js, SQL, AWS, Jenkins.

Lead Developer & Project Manager

01/2018 - Present

- Steered a strategic initiative, developing a Customer Relationship Management (CRM) system that automated communication for 100,000+ users. With a focus on backend development using Django and coordinating a team of developers, the system successfully delivered automated email campaigns, and organized client data efficiently. The project was pivotal in achieving a 40% uplift in customer engagement and enhanced data-driven strategies in marketing.
- Hard skills: Angular, Django, NoSQL, Google Cloud, Travis CI.

SOFT SKILLS

Leadership, Effective Communication, Problem Solving, Collaboration, Time Management, Continuous Improvement, Mentorship, Strategic Planning.
