

Lemon

EXPERIENCE

Frontend Developer

01/2013 - 06/2016

- Joined a digital agency, focusing on crafting interactive web applications for clients across various industries. Developed UI components using React, improving overall user experience and interaction. Participated in client meetings to gather feedback, aligning it with the development process.
- Hard skills: React, UI/UX Design, Client Feedback Integration, Web Application Development.

Backend Engineer

07/2016 - 11/2019

- Transitioned to a fintech company. Worked on scaling the backend infrastructure using Node.js and ensured seamless data flow. Collaborated with frontend teams for smooth API integrations and frequently reviewed code, ensuring optimization and best practices.
- Hard skills: Node.js, API Development, Backend Scaling, Code Reviews.

Tech Team Lead & Coordinator

12/2019 - Present

- Joined a healthcare startup focused on improving patient management and treatment efficacy. Led the charge in developing a telehealth application that bridged patients with specialized medical professionals, streamlining consultations. My primary role involved facilitating cross-functional teams, particularly between the UI/UX designers, backend developers, and medical consultants. Also, I spearheaded the decisions on our tech stack, leaning into cloud-based solutions and microservices to ensure scalability and performance.
- Hard skills: AWS, React Native, Jira, Shape Up methodology.

SOFT SKILLS

Effective Communication, Project Management, Cross-Functional Collaboration, Continuous Learning, Client-Centric Approach.
